

WHAT LIES BENEATH, COUNTS.

PATCHiTe, VAPORiTe+PLUS, iTe SLURRY, LEVELiTe

*While a perfect surface is the outward sign of a job well done, there's often much more to the story than meets the eye. At **iTe Products**[®], we believe that subfloor preparation, moisture protection and underlayments are just as important – if not more so. By paying careful attention to these preparatory steps, you can ensure that your customer's chosen floor covering looks good – and lasts.*

*That's why we've developed an entire sub-flooring system of complementary products, designed to be used in a specific order to address challenges from damaged screeds (**PATCHiTe**) and rising moisture (**VAPORiTe+PLUS**) to uneven surfaces (**LEVELiTe**).*

Our researched and systematic approach, backed up by our renowned warranty, sets the stage for perfect floor coverings.
